

Your Reliable Partner for THC Measurements

Print

USB Interface

Application

The Ratfisch USB Interface is used to connect the THC Analyzer to a Notebook or PC for Data recording, computing and display of Measurement Data on the PC Screen.

After computing the Analyzer Data are continuously recorded and graphically displayed on the PC-Screen. The powerful Software allows different settings of Parameters for Calculation and Display and is running under WIN 7, 8, 10 with 64Bit

The Data Export into an EXEL Data Base is implemented in the Basic Software.

System Requirements

- PC with WINDOWS® 7, 8, 10 with 64Bit
- Authorization for Installation and Configuration of Software
- At least one USB-Port (USB 2.0)
- Enough Installed Memory and Disc Space
